Better Workplace is the leading provider of on-line tools that help organizations optimize their triple bottom line performance through Intelligent Workplace and Workforce Management.

Businesses everywhere increasingly understand the “wow” of Intelligent Work. Organizations around the world are trying to figure out how they can introduce more intelligent workplaces and work-practices. They recognize that moving in this direction can have a profound impact on their top line business objectives, while improving their environmental performance and enhancing the overall employee value proposition.

The key question that many customers have at this point is how. How do I get started? How do I know it will work in my environment? How do I demonstrate rapid success for our business and for our employees? The new Intelligent Enterprise QuickStart System by Better Workplace is designed to help get customers the

answers to these questions and more in just a few quick steps

Designed for organizations who rely on objective and accurate data to drive enterprise decisions, QuickStart assesses employee work patterns and preferences, makes recommendations on employee work arrangements, and provides insight into the potential financial, environmental and social impacts associated with implementing a Flexible Work program.

The new QuickStart framework combines the collective experience of leading organizations and professionals that have rolled out Intelligent Work programs encompassing hundreds of thousands of employees worldwide.

KEY CUSTOMER BENEFITS

Data – undertaking an Intelligent Work initiative is not a small effort. Quickstart allows key executives to make enterprise decisions on objective data, not perceptions or personal biases.

No Guesswork – the integrated intelligent work roadmap unlocks the critical areas for management to focus on at each stage of development.

Save Time and Money – automated, real time reporting significantly reduces program office resource requirements and minimizes potential for error.

Ease of Use – simplified workflow and web based software interfaces enhance user participation.

No Install / Easy Configuration – Software as a Service (SaaS) removes system integration and maintenance requirements and costs and standardized administrative tools simplify deployment and operation.

Flexible / Scalable / Cost Effective – one time 12 month subscription and unlimited user based model allows a company to highly leverage their investment.

KEY FEATURES

Customer Demographics - ability to localize demographic questions for additional report filtering.

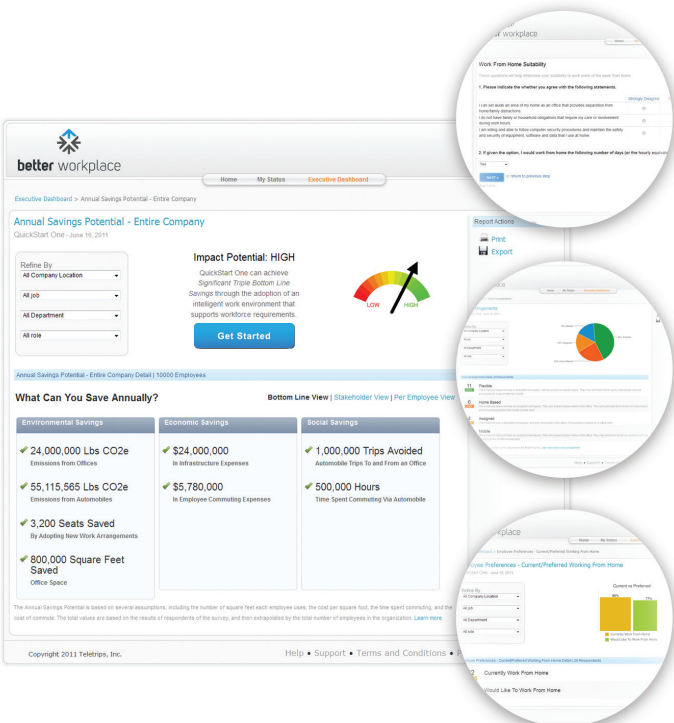

Work Profile Assessment - provides an objective assessment of individual work requirements and preferences, and identifies the best-fit work arrangement for each employee.

Standardized Workforce Reports – aggregated workforce segmentation analysis, recommended work arrangements, and employee work location preferences are all standard features.

Triple Bottom Line Savings Forecast - uses the organization’s workforce segmentation data and industry benchmarks to project the financial, environmental and human capital savings potential for the organization.

Intelligent Enterprise Roadmap Planner – customers are provided with a next steps roadmap and best practices framework showing them exactly where they are along the Intelligent Enterprise path and how to get to their desired state.

Intelligent Enterprise Management System Integration - allows seamless re-engagement with employee new work arrangement transition workflow process for those customers that want to proceed with Intelligent Work Implementation.
